

7-Segment NFC thermostat

The 7-segment NFC thermostat is an excellent choice to enhance your electric underfloor heating product line.

These thermostats offer features that make them both easy to integrate and energy efficient. The clear display shows the current temperature and offers options in an intuitive manner, making it user-friendly.

The thermostat also meets relevant safety standards and supports external temperature control.

TECHNICAL SPECIFICATION	
Product code	OMA0627
Display	LED-display 3x7-seg 13.2mm CA
Power supply	230V 50/60 Hz
Maximum load	16A (resistive)
Temperature range	+5°C...+40°C
Operating temperature	+0°C – +40°C
Temperature setback	Pilot Wire 230V 50/60 Hz
IP class	IP21
Color	Black RAL9011 White RAL9003
Sensors	Built-in room sensor and 10k NTC floor sensor in sales package
Supported sensor types	4.7, 10, 12, 15, 22, 33, 47k NTC
Smartphone application requirements	Android 6.0 or later phone with NFC support
Approvals	CE EN 60730-1 EN 60730-2-9
Guarantee	2 years
